Seeking Software Engineering roles (Full-Time, May 2026 — Co-op, Spring 2026)

EDUCATION

University of Illinois at Urbana-Champaign

Bachelor of Science in Computer Science

Champaign, IL

Aug. 2020 – Aug. 2024

University of Illinois at Urbana-Champaign

Professional Masters in Computer Science

Champaign, IL

Jan. 2025 – May 2026

TECHNICAL SKILLS

Areas of Interest : XR Development, ML/CV, Databases, Full-Stack SWE, Computer Graphics, Networking, CPU/GPU Parallel Programming

Languages: Python, C#, C++, Java, JavaScript, CSS, HTML, SQL, C, CUDA

Frameworks/Engines: React, Node.js, Flask, Unity, Unreal Engine

Developer Tools: Git, Github, Google Cloud Platform, VS Code

Libraries: NumPy, Matplotlib, WebGL, Pytorch, Tensorflow, pandas, ROS

EXPERIENCE

XR Software Development Contractor Intern

Kohler

May 2024 - Present

Champaign, IL

- Architected and implemented an AR defect-detection application in Unity, combining 3D computer vision pipelines with XR rendering for accurate virtual overlay of manufacturing deformations
- Directed end-to-end VR development projects including a VR training and collaboration platform for Kohler's global workforce and a UE5 based sales tool for realistic product visualization
- Created cost savings in excess of \$200,000 by replacing Kohler's reliance on an external XR developer
- Set technical roadmap and coding standards for XR projects, functioning as the primary engineer without full-time senior oversight

Undergraduate Research Assistant

University of Illinois at Urbana-Champaign

Sep. 2023 - Present

Champaign, IL

- Researched and tested new Gaze-Depth-Based interactions which use gaze focal point proximity as a hands-free method of reading input from the user in AR using the Magic Leap 2 AR headset
- Researched swipe typing for gaze as a hands-free method of text input in XR environments assessing overall effectiveness and teachability as metrics for future usability

Course Assistant for Introduction to CS

University of Illinois at Urbana-Champaign

Jan. 2021 - May 2021

Champaign, IL

- Aided students learning the Java Programming Language for the first time in office hours
- Contributed visual code walkthroughs to the course's website explaining fundamental programming concepts
- Tested homework and assessment materials before they were provided to students

PROJECTS

VR High Frequency Trading Data Visualization | *XR Lead*

Sep 2024 – Dec 2024

- Built a VR application for visualizing historic order book data from IEX, NASDAQ and live order book data from the Alpaca crypto exchange
- Created a VR Packet transfer visualization demo between different stock exchanges on a map of the US using real packet data

Unity VR Project | *Personal Project*

May 2023 – in Progress

- Built, tested, and maintained the code base of the real-time systems necessary for gameplay loops
- Explored the use of procedural-generation and the considerations needed for proper execution

Research Collaboration Web Platform | *Disruption Lab UIUC*

Sep. 2021 - Dec 2021

- Collaborated with a team of 6 to develop the UIUCollab web platform commissioned by the Siebel Center of Design to foster interdisciplinary collaboration among researchers at UIUC
- Employed web development technologies such as HTML, CSS, JS, React.js, Node.js, AWS Lambda, Azure Devops, and Figma
- Implemented methodologies such as agile software development in the completion of the project
